CV updated on January 3, 2024

Pavel Petráček

Personal information

Nationality	Czech
Date of birth	November 26, 1994
Languages	Czech (native speaker), great conversational English

Education

2019–present **Doctoral candidate in Informatics,** Department of Cybernetics, Faculty of Electrical Engineering, Czech Technical University in Prague (FEE CTU)
— **Ph.D. topic**: Robust UAV localization in perception-degraded environments
— **supervisor**: doc. Ing. Martin Saska, Dr. rer. nat.
— **publication count** (since 2019): 13 impacted journals (+ 1 preprint), 3 conference proceedings
— **h-index**: 7 in WoS, 11 in Google Scholar, **citations count**: 126 in WoS, 388 in Google Scholar

2017–2019 **Ing. — Master degree in Cybernetics and robotics,** FEE CTU

2014–2017 **Bc. — Bachelor degree in Cybernetics and robotics,** FEE CTU

Experience

2019–present **Doctoral candidate and research fellow at Multi-Robot Systems research group,** FEE CTU
— **research:** lightweight yet robust autonomy of mobile robots in perceptually degraded environments | decentralized swarming systems | robustness maximization in aerial robotics
— **key responsibilities:** co-development of MRS UAV system | transferring research concepts to the real world | design and realization of robotic experiments | robotic competitions | demos for investors, industrial partners, students, and media | student supervision | field popularization | academic teaching | summer school and workshop organization

Research projects & competitions

2020–2022 **DARPA Subterranean Challenge:** Exploration of unknown subterranean environments with a cooperative team of ground and aerial autonomous robots
— **contributions & responsibilities:** development of novel methods of lightweight perception, localization, and mapping of UAVs in perception-degraded environments | UAV system design | real-time systems integration | system evaluation and testing | key member for in situ deployment of aerial robots

2018–2022 **Dronument:** Documentation of interiors of historical structures with autonomous aerial robots
— **contributions & responsibilities:** development of a robust HW & SW system capable of deploying a fully autonomous UAV team within interiors of historical structures | focus on on-board UAV localization and prevention of its degeneracy in geometrically featureless environments | deployment of the system for documenting 17 historical objects (including 2 UNESCO sites) with direct use in heritage preservation

2017-present **Swarming:** Decentralized communication-less control of UAVs among obstacles
— **contributions:** novel bio-inspired algorithms for communication-less perception-aware coordination of UAV teams in environments with obstacles

2020-present **DOFEC:** Extinguishment of fires in aboveground floors using an autonomous UAV
— **contributions:** detection and localization of fires from on-board sensors | mission planning

International stays

2023 **Autonomous Robots Lab at NTNU:** 2 months research stay, cooperation on doctoral topic with prof. Kostas Alexis

Industry

2023–present **Fly4Future s.r.o.:** technical consulting | grant writing | employee training

2016-2017 **CertiCon a.s.:** learned how to properly think about and write automated software tests | gained experience in corporate project management and scheduling

2012-2014 **KD planeta s.r.o.:** first-hand experience with robotic automation — interaction between human operators, robotic manipulators, and CNC machinery

Honors & awards

2022 **Methodology M17+:** excellent international evaluation of our **Dronument functional sample**

2021 **DARPA Subterranean Challenge:** team CTU-CRAS-NORLAB competing with international universities and companies (e.g., Caltech, MIT, ETH Zürich) in multi-robot search & rescue operations in underground environments
— 1st place among non-funded teams in the Urban Circuit, real-world deployment ($500k)
— 2nd place among all teams in the Final Round, virtual deployment ($500k)

2019 **Dean's price for astounding Master thesis at FEE CTU**
— **topic:** Design, localization and position control of a specialized UAV platform for documentation of historical monuments

2017 **Dean's price for astounding Bachelor thesis at FEE CTU**
— **topic:** Decentralized model of a swarm behavior Boids in ROS

Academic activities

Teaching
- Algorithms and Programming: Python and basic programming algorithms for Bachelor students
- Multi-Robot Aerial Systems: for Master students, author of UAV swarming task #3

Workshops
- Seminar tasks introduction, *In IEEE RAS Summer School on Multi-Robot Systems*, 2022.
- Dronument workshop (organizer and speaker), *hosted at FEE CTU*, 2021.
- Importance Sampling: Degradation-Aware Alternative to Voxelization in Robot Pose Estimation, *In IEEE IROS IPPC **and** ROPEM workshops*, 2023.
- Cooperative UAV Autonomy of Dronument: New Era in Cultural Heritage Preservation, *In IEEE IROS IPPC workshop*, 2023.
- Decentralized Aerial Swarms Using Vision-Based Mutual Localization, *In IEEE IROS (Workshop on Integrated Perception, Planning, and Control for Physically and Contextually-Aware Robot Autonomy)*, 2018.

Conference committee
- Co-chair of session *Micro and Mini UAS I* at ICUAS'22 (chair: prof. Subodh Bhandari).

Reviewer for journals and conferences
- Transactions on Cybernetics
- Transactions on Robotics (T-RO)
- Robotics and Automation Letters (RA-L)
- International Conference on Robotics and Automation (ICRA)
- International Conference on Intelligent Robots and Systems (IROS)

Supervised students

Ing. **Vojtěch Nydrle,** Cybernetics and robotics, FEE CTU
— thesis: Extinguishing of Indoor Fires by an Autonomous UAV

Bc. **Vojtěch Nydrle,** Cybernetics and robotics, FEE CTU
— thesis: Design of a specialized UAV platform for the discharge of a fire extinguishing capsule (Dean's price for astounding Bachelor thesis)

Martin Fischer, Cybernetics and robotics, FEE CTU
— thesis: Lidar and multi-camera calibration and fusion (Dean's price for astounding Bachelor thesis)

Peer-reviewed publications
